-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 22 January 2008.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-11 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-11 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

DETAILED ACTION

Claims 1-11 are presented for Examination.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Raghunathan (U.S. Patent No. 4,517,179) in view of McCarty (U.S. Patent No. 5,776,504).

Raghunathan teaches that Applicant's active agent, metolazone is an antihypertensive agent (column 1 lines 24-28).

Raghunathan does not teach the employment of metolazone for the treatment of pre-eclampsia, effective amounts, and dosing frequency set forth in the claims.

McCarty teaches that standard treatment for pre-eclampsia consists of antihypertensive drugs (column 2 lines 9-15).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to employ metolazone for the treatment of pre-eclampsia because Raghunathan teaches that metolazone is an antihypertensive agent that is a standard

treatment of pre-eclampsia in view of McCarthy. One would have been motivated to make such a modification in order to achieve an expected benefit of metolazone having antihypertensive effect that is useful in the treatment of pre-eclampsia. There is a reasonable expectation of successfully treating pre-eclampsia with metolazone because antihypertensive such as metolazone is a standard treatment that is used in the treatment of pre-eclampsia in view of McCarthy.

The amounts of active agents to be used, the dosing frequency (e.g., repeating treatment periodically or every 24 hours), pharmaceutical formulations oral, solid dosage forms; mode of administration, flavors, surfactant are all deemed obvious since they are all within the knowledge of the skilled pharmacologist and represent conventional formulations and modes of administration.

Further, the mechanism of action of treatment without adversely affecting the fetus and treatment without substantial volume reduction in intravascular extracellular fluid is obviously an unavoidable effect upon the administration of the same active agent in the treatment of pre-eclampsia.

For these reasons the claimed subject matter is deemed to fail to patentably distinguish over the state of the art as represented by the cited references. The claims are therefore properly rejected under 35 U.S.C. 103.

None of the claims are allowed.
